

食品学院报告通知

Induction of antimicrobial peptides against infections in human

演讲嘉宾:

Guðmundur Hrafn Guðmundsson
教授

冰岛大学
生命与环境科学系

主持:

孙嘉/陈永泉
食品学院功能脂质与健康中心

日期:

2013 年 5 月 28 日 (星期二)

时间: 上午 10:00 - 10:30

地点:

食品学院 9 楼嘉益里海厅

联系人: 孙嘉

电邮: jiasun@jiangnan.edu.cn

BIOSKETCH:

Guðmundur H. Guðmundsson studied Biology at the University of Iceland and completed his PhD on insect immunity in 1992 at the Department of Microbiology, University of Stockholm. In his postdoctoral work at the University of Stockholm and Karolinska Institutet (Microbiology and Tumor biology Center, MTC) the research was focused on mammalian innate immunity, 1992-1998. GHG was appointed Associate Professor in Immunology, Karolinska Institutet in 1999. In 2001 GHG became a professor of cell biology at the University of Iceland.

In 1994 he discovered the human antimicrobial peptide LL-37 and most of his research activity has been on human antimicrobial peptides in health and disease. In 1996 he was awarded Letterstedtskapriset from The Royal Swedish Academy of Sciences. GHG has published 65 original articles on antimicrobial peptides and innate immunity with a total citation of 6215.
